P. P. Vitaliano (Seattle)

S. Watson (Ann Arbor)

Publishing and Advertising Offices

Pergamon Journals Ltd., Headington Hill Hall, Oxford OX3 0BW, U.K.

1986 Annual Subscription Rates

For libraries, university departments, government laboratories, industrial and other multiple-reader institutions, U.S. \$135.00 per annum; two-year rate (1986–87) U.S. \$256.50 (including postage and insurance). For members of the International Society of Psychoneuroendocrinology, U.S. \$30.00 per annum.

In the interests of maximizing the dissemination of the research results published in this important international journal, we have established a two-tier price structure. Any individual whose institution takes out a library subscription may purchase a second or additional subscription for personal use at a much reduced rate of U.S. \$50.00 per annum. Subscription enquiries from customers in North America should be sent to: Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Journals Ltd., Headington Hill Hall, Oxford OX3 0BW, U.K.

Microform Subscriptions and Back Issues

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

Published Quarterly

Copyright © 1986 Pergamon Journals Ltd.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignments. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A. The Item-Fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of \$3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970.

Permission for other use. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-Fee Code for this publication is: 0306-4530/86 \$3.00 + 0.00

**PSYCHONEUROENDOCRINOLOGY
TEN YEAR AUTHOR AND KWIC INDEXES
VOLUMES 1 - 10, 1975 - 1985**

Both the author and the Key-Word-In-Context (KWIC) indexes list the volume number and the first page for each citation. In the author index, authors of every article are listed. In the KWIC index, each significant word of every title is listed alphabetically, within the context of its title. (Each listing includes a portion of the title just preceding and just following the key word.) For example, to conduct a search for all citations on 'cortisol', one also should look under the alternate terms 'adrenocortical' and 'corticosteroids' to be certain all pertinent information is retrieved.

KEY-WORD-IN-CONTEXT INDEX

terference of ACTH-10 with discriminative f ORG2766 and ACTH-10. Social and exploratory corticosterone. 11-deoxycorticosterone, 11-deoxycortisol, cortisone and estradiol-17-beta uptake and metabolic feedback actions of 17beta-estradiolbenzoate. Editorial: 1982 Miscellany. Editio ellany. Editorial: 1983 Miscellany. Editio ellany. Editorial: 1984 Miscellany. Editio ellany. Editorial: 1985 Miscellany. Editio ellany.	3: 203 8: 343 7: 329 7: 329 6: 105 2: 173 2: 203 7: 1 8: 1 9: 1 10: 1
Effects of ACTH-24 on male rat behavior atients on mood and 24-hour rhythm of growth manic patients. A 24-hr monitoring of the nd-Swiss mice. MER-25 does not inhibit the e and metabolism of 3H-estrone in neural an and labelling with 3H-uridine. Growth in desaculination: 46,XX congenital virill nal hyperplasia and 46,XX androgen-insensit seling. 47,XXY and 46,XX males with antio schizophrania and a 47,XXY karyotype: a cas y plus counseling. 47,XXY and 46,XX males othalmic serotonin (5HT) before ovulation i tive arousal during 64 hours of sleep depri le of phospholipase ing hormone elicits abnormal hormone respon niffers. Endocrine omegalic subjects. Absent prolactin respon d respectively with in the syndrome of abuse dwarfs. Growth acetate (HFA) in girls. medroxyprogesterone acetate (HFA). Prenata acid (GABA) in the regu acid (GABA), a modulat onal and free fatty acid changes during str t conteroids on amino gamma-aminobutyric gamma-aminobutyric gamma-aminobutyric acid) levels in brain c asma glucose, amino acids and nonesterified acids to insulin in dep ns. Volatile fatty acids, "copulins", in h ophan in normal and acromegaly subjects. f growth hormone in acromegaly. Amitriptyl	3: 203 8: 343 7: 329 7: 329 6: 105 2: 173 2: 203 7: 1 8: 1 9: 1 10: 1 10: 431 10: 273 1: 419 6: 131 5: 25 1: 359 9: 405 9: 405 1: 165 1: 207 1: 165 2: 267 4: 219 5: 353 10: 481 9: 315 5: 261 8: 309 8: 309 2: 391 2: 363 2: 227 9: 97 4: 79 4: 207 7: 15 5: 319 6: 113 9: 161 9: 161 1: 153 5: 261 5: 81
of vasopressin and anone suppression. ACTH and multistatoid r tonin, cortisol. ACTH in patients with m nship of endogenous ACTH levels to visual- sociated effects of ACTH on motor activity, eta-endorphin with ACTH or epinephrine on er the influence of ACTH peptides. Develop n the regulation of ACTH secretion: a revie old responses after ACTH stimulation and de amnesic action of ACTH, beta-endorphin a as of human labor. ACTH, beta-endorphin a ctation. Effect of ACTH, epinephrine, beta ACTH, epinephrine, Met- est injections of ACTH, vasopressin, epin level of the CNS. ACTH-like peptides and h test. Effects of ACTH-24 on male rat be ive interference of ACTH-10 with discrimin tion of ORG2766 and ACTH-10. Social and e digm. Effect of an ACTH-9 analog on human earch for a mode of action and a hypothesis regulation of LHRH action at the pituitary and anti- amnesic action of ACTH, beta- e in cats. Site of action of development o lamic and pituitary action. Gamma aminobut h opiate antagonist action: their possible nes in the feedback Actions of 17beta- estr le of glial cells. Action of steroid horm oes not inhibit the activation of aggressio ment when adult for n the extinction of active avoidance behavi gic and cholinergic activity and function i eceptivity, ovarian activity and ovulation i pituitary- adrenal activity as a consequen rances in aromatase activity during early p ditorial: Endocrine activity in air traffic the day. Endocrine activity in air traffic relates. Endocrine activity in air traffic ridity. Endocrine activity in air traffic rogen of electrical activity in the hypotha ne-beta-hydroxylase activity in the locus c abinoide: structure- activity relationships. ts of ACTH on motor activity: aggression an es with opiate-like activity: evidence that gulation of thyroid activity: possible in rain. How the self acts on the brain. How tides: influence of acute and chronic effec orone in the cat. Acute and chronic morph mic parameters by acute and repetitive st on: a pilot study. Acute effects of heroin	3: 261 9: 147 10: 173 10: 33 4: 21 8: 81 10: 445 9: 107 9: 147 9: 177 10: 289 8: 81 7: 229 10: 165 2: 63 10: 431 3: 203 8: 343 6: 301 6: 311 9: 319 8: 277 9: 77 2: 17 9: 97 2: 1 2: 203 3: 47 6: 131 5: 305 1: 219 8: 225 6: 121 4: 275 10: 355 7: 97 7: 101 7: 113 7: 125 5: 13 7: 223 5: 53 4: 21 2: 59 8: 89 7: 271 2: 43 3: 237 6: 91 1: 359
